

APPENDIX A

Guideline for Dart Board Set-Up

Boards that are mounted inside a lighted ring (e.g. Circumluminator) are acceptable as this form of lighting is sanctioned by the ADO. Toe lines must be affixed to the floor using tape or other adhesive material. Laser and other lighted toe lines are not acceptable. **The multiple board setup is a requirement for new bars (effective Spring 2025). Establishments hosting prior to Spring 2025 season will be grandfathered in with existing setup.**
